### **DETAILED ACTION**

Claims 48 to 73 are pending in the instant application. Claims 1 to 47 have been canceled, and claims 48 to 73 have been added as requested by Applicant in the correspondence filed 16 March of 2006.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 48 to 60, drawn to an assay employing a mixture of cells, each of which expresses a particular GPCR conjugate, wherein the mixture comprises cells expressing either of two different GPCRs.

Group II, claim(s) 61 to 73, drawn to an assay employing an individual cell, wherein that cell expresses each of two different GPCR conjugates.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The only structural element that is common to the two inventions is the employment of a conjugated GPCR in the detection of agonist thereto. The concepts of screening multiple receptors by employing a mixture of cells or a mixture of receptors are distinct in the art, and the disclosure of one would not anticipate or necessarily suggest the other. Because the

Art Unit: 1649

Barak patent (6,110,693, cited by Applicant) shows that the employment of cells expressing GPCR conjugates in the identification of agonist thereto was known in the art prior to the time of the instant invention, the two claimed inventions do not reflect a common inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
